

KONICA MINOLTA

# FOCUS ON HEALTHCARE WITH CERNER CERTIFIED **KONICA MINOLTA MFPS AND PRINTERS.**

## HEALTHCARE

Konica Minolta continuously strives to offer business solutions that address the changing technology needs of its customers. With that in mind, many of Konica Minolta's Multifunction Products (MFPs) and Printers have passed the stringent certification requirements of the Cerner Corporation and are authorized for use by healthcare professionals with a Cerner Millennium®/AIX, HP-UX and OpenVMS environments.

Cerner is a leading U.S. supplier of healthcare information technology solutions that optimize clinical and financial outcomes. Around the world, health organizations turn to Cerner for their dedication to healthcare, end-to-end solutions and service portfolio, and proven market leadership.

# CERTIFIED COMPATIBILITY.

The Cerner Certification process is a functional evaluation of technology that was designed to minimize downtime, reduce risks and ensure compatibility. With this certification, Konica Minolta products are proven to be fully compatible with Cerner Millennium applications. Healthcare customers using these certified Konica Minolta devices are able to print from a single information system — the same system they use to run tests, record/share diagnoses, write and fill prescriptions, provide patient care instructions, order medical supplies, or generate invoices. Each Konica Minolta device is put through Cerner’s rigorous 6-8 week print certification process after the product is received at Cerner’s Kansas City testing facility. The process includes development of necessary operating systems scripts, installation and support documentation, and training of Cerner support associates. Cerner currently offers programs for laser printers, thermal printers, and bar code scanners. Once certified, Cerner lists the product on its internal customer website and sends Konica Minolta proof of certification.

## Certified Customer Support 24/7 — 365 Days a Year

This certification also gives healthcare customers added peace of mind by providing access to product support services 24/7 and 365 days a year through the Cerner Help Desk. As part of the certification process, Cerner support associates are thoroughly trained on all Konica Minolta certified devices. In addition, Konica Minolta provides on-going training and engineering support for the life-cycle of the product. This gives a healthcare professional the ability to call and report a non-functioning device, any hour of the day or night, and receive remote support to get that device up and running as quickly as possible.
