BROCADE<sup>®</sup>

The proper disposition of decommissioned IT assets has become extremely complicated. We can help simplify this process for your organization by providing a flexible, scalable set of ITAD service offerings and based on the valuation of your retiring assets, help you recover the maximum fair market value possible.

### Enterprise ITAD

We specialize in refurbishing, remarketing or responsibly recycling retired IT equipment and our strict chain-of-custody and verified data erasure methodology ensure the security necessary to help your organization manage and mitigate risk.

### Onsite Services

Experienced technicians from our field services team are available to manage your requirements during all stages of the asset lifecycle. We offer onsite audits, asset identification and valuation, data erasure and destruction, packing, palletizing, secure reverse logistics, and a full suite of professional services.

### Value Recovery

Buyback or Remarketing options are available to help you maximize IT asset recovery values. Equipment with no remaining value is recycled following R2 Certified Recycling standards.

### Risk Mitigation & Brand Protection

Data and device destruction is performed in one of our 26 secure, global ITAD processing facilities.

### Full Reporting Transparency

Transparent reporting delivers our clients complete visibility and chain of custody accountability.

### Environmental Responsibility

Zero E-Waste to landfills or developing countries as a result of downstream due diligence.

Contact All Covered Toll-Free Nationwide at 866-446-1133 or visit [www.AllCovered.com](http://www.AllCovered.com)

## Secure ITAD & Global Coverage

### Chain-of-Custody

Serialized asset tracking and reporting through a single, global tracking system. Detailed audit trail to provide end-to-end visibility and prove compliance.

### Responsibility

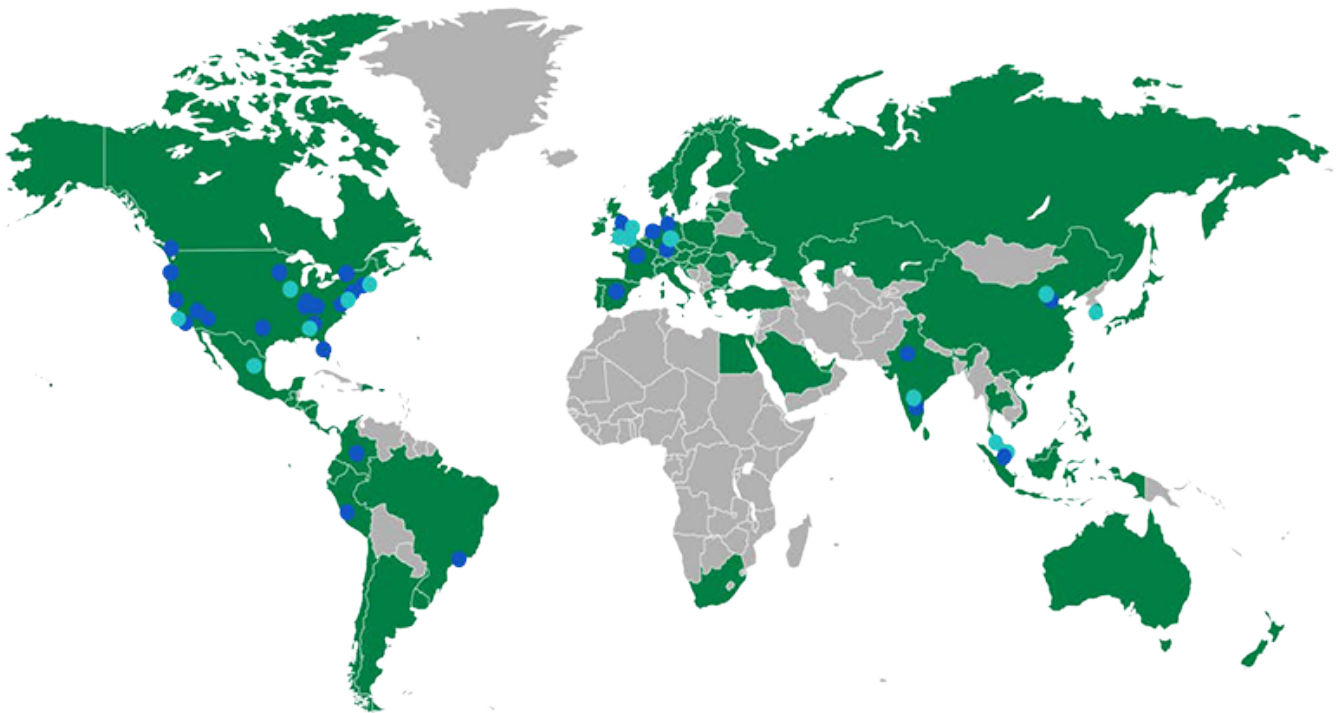

Data destruction and e-waste recycling services that comply with legislation worldwide.

### Data Security

Certified data erasure and degaussing / shredding services available at your location or at a processing center to protect your company from risk.

### Accountability

Best-in-class technology with secure web portal access for global visibility.

### About All Covered ITAD

We are a leading worldwide provider of enterprise IT asset disposition (ITAD), lifecycle support services, onsite data destruction, and e-waste recycling services that reduce the risk, cost, and complexity associated with securely managing IT assets throughout their lifecycle in compliance with environmental and data security regulations.
