SMART SECURITY TO KEEP YOUR BUSINESS SAFE

bizhub SECURE NOTIFIER

MONITOR YOUR BIZHUB'S SECURITY SETTINGS

bizhubs offer comprehensive security settings to protect your MFP via bizhub SECURE*, the award-winning security service that locks down, hardens and protects the device prior to being connected to your network. With the bizhub SECURE Notifier app, these settings are constantly monitored to ensure the the status of each remains intact and your device is safeguarded at all times.

The bizhub SECURE Notifier app allows at-a-glance notifications of the MFP's security status. After setup, MFPs that do not conform to the enabled security settings, will display a red lock icon to immediately alert you that a setting has been compromised. Opening the app will show exactly which settings need to be updated to meet security requirements.

These security settings can include:

- Administrator Password
- bizhub Storage Media Encryption
- SSD/HDD Password Protection
- Auto Document Deletion
- Temporary Data Overwrite**

Administrators can also use the app to view security logs, reports and even send email with security information. With the bizhub SECURE Notifier from Konica Minolta, your company's document security has never been easier.

There's also a bizhub SECURE Notifier Tile. The bizhub SECURE Notifier app can be configured to display as an MFP Tile on the MFP Home Screen, providing you with instant access to information about your MFP's security status.

By using the app as a Tile, you have the extra convenience of being able to quickly assess the MFP's security status immediately upon walking up to the bizhub device—no additional tapping involved.

The bizhub Secure Notifier Tile is automatically available with purchase of the bizhub Secure Notifier app.

*Requires a bizhub Secure Service, which provides optimum protection by enabling the appropriate settings for device storage media and network security.
** Not required on i-Series MFP due to SSD media technology

When bizhub settings are not secure

When bizhub settings are secure

VISUAL SECURITY SETTING NOTIFICATION

The status of the MFP's security settings are prominently displayed on the control panel for quick at-a-glance notification so you can take immediate action if a setting has been compromised.

EMAIL SECURITY SETTING NOTIFICATION

An Email notification is sent to the system administrator whenever a bizhub's security setting has been changed so that immediate action can be taken to address the issue and keep your bizhub protected.
