AccurioPro CloudEye
CLOUD COLOR MANAGEMENT SYSTEM
MULTIPLE PRINTERS OR MULTIPLE LOCATIONS?

A CLOUD-BASED COLOR MANAGEMENT SYSTEM FOR YOU.

Accurate. Real-time. And easy to use.
Giving you precise color regardless of user’s experience.

AccurioPro Cloud Eye provides centralized color management and quality control for businesses with multiple print devices and multiple locations — all via the cloud. By automating color management, this easy-to-use, remote solution provides accurate, brilliant color from each printer, regardless of the operator’s experience. The result? Reduced man-hours, decreased costs controlling print quality across multiple sites and improved quality across the board.

AccurioPro Cloud Eye is part of Konica Minolta’s AccurioPro suite of professional printing solutions, a series of digital printing solutions and services that automate printing tasks to transform the way you do business today and in the future.
REAL-TIME SHARING AND COLOR MANAGEMENT VIA THE CLOUD

Reliable color management is critical to reducing costs. AccurioPro Cloud Eye is simple to use, enabling anyone — not just color experts — to produce outstanding, consistent color across all your printers.

Monitor Print Quality – The cloud database keeps records of all printer validation measurements so you can easily track and analyze color quality from anywhere in the world.

Printer Validation – Check whether your printer is out of tolerance just by measuring a color bar against an industry standard, such as GRACoL or Fogra.

Printer Profiling – Create device link profiles and ICC output profiles quickly.

Setup and Management Functions – Create, edit and delete trackings, target configurations, company links, users and more.

DAILY COLOR MANAGEMENT THAT ELIMINATES ERRORS
Just by following the procedure preset by an administrator, you’ll get unified color management for all printers. It’s easy — simply measure the printed control wedge. AccurioPro Cloud Eye then shares the color management standards across all your printers, in all locations. Validation results and color data are stored in the cloud. Meaning color quality and brand managers can even check the most up-to-date information at their computers or mobile devices.

CENTRALIZED COLOR MATCHING MADE POSSIBLE
Because AccurioPro Cloud Eye employs a feedback method for measurement results, it’s easy to create high-precision Device Link profiles to match color standards even for a user without color expertise.

The administrator or designated color expert defines profile creation settings. Then AccurioPro Cloud Eye delivers and shares them across all locations.

SHARE CRITICAL COLOR DATA
By providing Tracking and Target Configuration, AccurioPro Cloud Eye allows you to share this essential information across all locations and even with key customers or external AccurioPro Cloud Eye users. This streamlines your operations — reducing total costs. You can share:

- Color Standards Configuration
- Combining color standard target values and pass/fail tolerances, and condition settings for Device Link profile creation.
- Tracking
- A combination of the printer and its target configuration to manage printer color reproduction.

ACCURIOPRO CLOUD EYE ENSURES ACCURATE COLOR MANAGEMENT AT ANY LOCATION
- Office
- Mobile
- Factory
- Home
- Open

OR WITH ANY PRINT TECHNOLOGY
- AccurioJet KM-1
- AccurioPress C2070/C2060
- bizhub PRESS C71cf
- bizhub PRESS C1100/C1085
- Multifunction Printers
- Offset Printing
- Inkjet Wide & Grand Format Printing
- Packaging Printers
- Contract Color Proofing

</table>

**MAIN FUNCTIONS**

**Daily management**
- Measurement of management control wedge<br>- Pass/fail judgment for measurement data

**Reporting**
- List display of management status of multiple printers and locations<br>- Time-series graph, detailed information on measured values<br>- Reports for measurement results

**Color matching**
- Profile creation<br>- Device Link profile<br>- Printer profile<br>- Automatic optimization of profile through measurement data feedback

**Data sharing**
- Sharing of printer management status and measured values for each target (Tracking sharing)<br>- Sharing of Target Configuration (combination of measurement conditions and management standards)<br>- Sharing of Tracking and Target Configuration among users

**Setting of usage conditions**
- Creation and registration of Target Configuration<br>- Content of Target Configuration<br>- Target ICC profile<br>- Tolerances of pass/fail judgment<br>- Daily management control wedge<br>- Device Link profile creation settings<br>- Measurement equipment settings<br>- Creation and registration of Tracking<br>- Tracking: daily management unit = combination of printer and Target Configuration<br>- Creation of employee user ID<br>- 3 tiers authorization settings

**QUICK FACTS**

Konica Minolta's AccurioPro Cloud Eye allows centralized color management of multiple printers or multiple locations via the cloud. An easy-to-use, browser-based interface allows any operator to provide accurate, real-time color reproduction.

- Monitors quality of color printers and presses in real-time with browser-based dashboard
- Alerts operators and management of quality errors
- Full automation of color management with KM's IQ-501 equipped digital presses
- Connects directly to Konica Minolta and some third-party digital front ends
- Maintains historical database of color quality performance for reporting and analytics
- Allows operators to maintain ISO and G7 color standards on-the-fly
- Ink-saving technology for toner, inkjet and other technologies
- Remote diagnostics to fix color-related problems reducing expensive onsite service calls

**SOLUTIONS FOR MAXIMIZING PRODUCTIVITY AND GROWING YOUR BUSINESS.**

AccurioPro is a comprehensive suite of modular tools and solutions that automate labor-intensive processes to streamline workflow and maximize productivity. As industry demands continue to change and grow, AccurioPro will drive efficiencies to reduce costs, increase accuracy and productivity, while strengthening your current investments.
